

Ideation Phase

Empathize & Discover

Date: 29 September 2026

Team Leader: Natshitha.P

Team Members: Nivedha.A, Sanmathi.B, Merlin.Y

Project Name: AI Blog Nest API

Maximum Marks: 4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Team Leader: Natshitha.P

Team Members: Nivedha.A, Sanmathi.B, Merlin.Y

THINK & FEEL	Wants faster content creation, reliable blog management, secure access, and concise summaries. Feels concerned about time, content quality, and security.
SEE	Sees large amounts of blog content, repeated manual writing tasks, comments requiring moderation, and the need for organized categories and tags.
HEAR	Hears requests for fresh content, readable summaries, quick publishing, secure administration, and better content discoverability.
SAY & DO	Creates or manages blog posts, adds tags/categories, reviews comments, requests AI-generated content, and uses summaries for quick understanding.
PAINS	Manual writing is time-consuming; organizing content can be difficult; comment moderation requires effort; unsafe input can create security risks; long articles take time to summarize.
GAINS	AI-assisted blog generation, automatic summarization, CRUD management, categorization, comment moderation, role-based access, and input sanitization improve efficiency and security.
