

**Project Design Phase
Proposed Solution Template**

Date	29 September 2026
Team ID	SWTID-2026-7735
Project Name	AI Blog Nest API
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Manual blog creation, organization, summarization, and moderation are time-consuming, while insecure inputs and unauthorized access can create backend management risks.
2.	Idea / Solution description	AI Blog Nest API is a secure backend that supports CRUD blog operations, role-based route guarding, categorization and tagging, comment moderation, payload sanitization, AI-driven blog generation, and intelligent content summarization.
3.	Novelty / Uniqueness	Combines AI-generated structured blog content and semantic summarization with secure role-based API management, moderation states, categorization, and sanitization safeguards in one backend solution.
4.	Social Impact / Customer Satisfaction	Reduces content creation effort, improves access to concise information, supports organized publishing, and provides safer interaction between users, content, and administrative functions.
5.	Business Model (Revenue Model)	Potential revenue models include subscription-based access for advanced AI generation and summarization, usage-based API plans, and premium features for content teams or organizations.
6.	Scalability of the Solution	The modular REST API can be extended with additional AI/LLM providers, more user roles, analytics, media storage, search capabilities, and higher-capacity deployment as usage grows.
